ABSTRACT

 Tourism is an important sector of the economy and contributes significantly in the country's GDP as well as Foreign Exchange Earnings. Tourism needs variety and India with vast dimension and diversity offers to every class of visitor something not found elsewhere. There is comparatively little investment needed for promoting tourism. The scope for its expansion is unlimited. Capacity building as it relates to the overall quality of life in the Communities. Hospitality & tourism offers immense scope of employment generation just by Capacity building schemes. Government of India through its Ministry of Tourism has initiated several programmes like Hunar se Rozgar tak and Capacity Building for Service Providers   in last 05 years with objective of using tourism as tool for poverty alleviation through employment generation.

Key Words: Tourism, Hospitality, Capacity Building, Hunar Se Rozgar, Government

Quality Analysis of Portable Mobile Phone Charger

ABSTRACT

The dependence on Mobile is worldwide. The need of mobile charging frequently becomes troublesome especially in places where no power supplies are available, when power supply is cut off, at travel time and many times in case of emergencies. With increasing rate of digitization in every sector, every common individual is keeping their well verge with constant utilization of cell phone. This research paper is analysing the efficiency of portable mobile phone charger developed in electronics lab. The developed product will solve problem by using an intelligent Compact and Portable Mobile Phone Charging System. This Device is capable of charging any mobile phones anywhere any time even where no power supplies are available.

Digital India' – The Next Step in E-Governance

Mridula Venugopal
Computer Faculty, The Sobha Academy,Kerala
mridulammohan@gmail.com

ABSTRACT

E-Governance is not mere governance – it is a technological way in which the public sector service providers interact with citizens. Though the implementation of E-Governance has proved very effective and has earned global acclaim, unfortunately in a developing country like ours it has not been too successful. The purpose of this study is to give an insight into how E-Governance has been implemented in India, its scope and aims and why it was not able to meet its aim. The study also discusses a new E-Governance initiative introduced by our present government - The Digital India Programme, which is a step taken to meet all the shortcomings that exist in the present E-Governance system. The vision, aim and the strategies of the Digital India Programme are also discussed here.

Keywords: E-Governance, Success and failure of E-Governance, Digital India, NEGP, Scope of Digital India.

Role of Earned Value Management and Earned Schedule in Project Management to Reduce risk ,delay- time and cost in Project Management.

Priya Deshpande
Assistant Professor, IICMR, Nigdi
Email:priyadeshpande06@gmail.com

ABSTRACT

Earned Value analysis (EVA) is the most effective tool used for intermediate review of project execution .It is helpful to project managers and management team to understand the progress of project work throughout the project life cycle.
The Earned Schedule (ES) is used to estimate the time or duration of project/s for appropriate evaluation project execution. ES also help to forecast the time required to complete the project.
When combined with schedule analysis, ES can enhance the project. EVA provides the powerful tool for better decision making in project management. The paper discuss about the Effectiveness of this project management tool .If the project schedule performance shows poor results then manager need to take the corrective action with help of this tool. For making better decision in project scheduling, Project managers can review the parameters using this tool.
A wrong decision may lead to great loss, so project managers should be very careful while taking corrective actions.
